

Pole of excellence in high precision mechanics

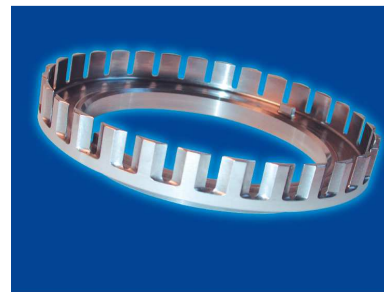

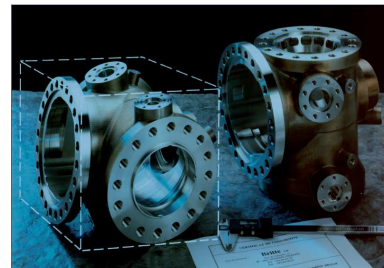

“Britte-Mustad” belongs to the mechanical division of the family group MUSTAD INTERNATIONAL GROUP founded in Norway in 1832.

This Family Group has built his reputation, not only on the Quality of their products, their diversified and industrial strategy, but also on the respect of their commitments.

Britte-Mustad's main missions are:

- Design and manufacturing of measuring and control systems
- Manufacturing of :
 - unitary high precision mechanical components by various machining technologies. References : CERN, SCK-CEN...
 - prototype series, and medium & large production batches, by various machining technologies
- Non-destructive control
- Assembly, welding and testing of electromechanical components in fields such as aeronautics, spatial, medical, nuclear and defence.

In the association with the other nearby division “Mustad Belgium”, which produces mechanical components by screw-cutting and machining on CNC production centers, we are able to cover a huge range of additional machining capabilities and a high level of technology.
